TECHNICAL DATA SHEET

AG COLOR -S19
COLOUR PRECIPITANT

Product description

AGcolor-S19 is a cationic polymer specially designed for the sugar cane juice colour precipitation. AGcolor-S19 also removes high molecular weight impurities from sugar cane juice through flocculation.

Benefits:

- ✓ Very easy to use
- ✓ High percentage of decolorizing
- ✓ Cost effective

Dosage

Recommended dosage is 10- 20 ppm on juice is sufficient to get high degree of decolourization.

Specification

Items	Standard
Appearance	Pale yellow viscous liquid
Solid content (120°C,2h) %	39-41
Viscosity (25°C, #4 @ 30 rpm) cPs	8000-13000
PH Value (1% water solution)	5.0-8.0

Handling and Storage

The product can irritate the eyes and skin. Rubber gloves, goggles and protective clothing are recommended for use while handling. Stable at ambient temperature and storage conditions.

See MSDS for more details.

Packing

AGcolor-S19 Available in 30Litre, 200Litre drums.
