TECHNICAL DATA SHEET

AQUA AG-130

MULTIPURPOSE CHEMICAL FOR BOILERS

Product description

Aqua AG-130 is specially designed product to control the corrosion and scale formation in low and medium pressure boilers. Aqua AG-130 is a blend of phosphates and sulphites which give excellent protection for boilers.

Application

Aqua AG-130 protects the boiler from corrosion by forming a protective film which prevents the direct contact of corrosive media with metal surface. The dispersing agents in Aqua AG -130 do not allow accumulating suspended particle. The threshold inhibitor present in Aqua AG-130 prevents the scale formation on the metal surfaces like pipelines and internal boiler.

Dosage

The Aqua AG-130 can be feed continuously to the feed water without dilution. The dosage will vary and can be calculated based on the water characteristics, operating conditions and boiler systems.

Specification

Appearance	Colorless liquid
pH	9.0-11.0
Specific gravity	1.06-1.16

PO BOX 16887, JEBEL ALI FREE ZONE, DUBAI, UNITED ARAB EMIRATES

REG.ADDRESS:P.O BOX 313, TORTOLA, BRITISH VIRGIN ISLANDS
