TECHNICAL DATA SHEET

AQUA AG-500

DEFOAMER

Description

Aqua AG-500 is silicone based defoamer. It is a synergetic blend of ester of fatty acid and silicone. Aqua AG-500 shows tremendous defoaming and antifoaming properties.

Benefits

- Defoams very faster
- Very good antifoaming property
- Soluble in water
- Economical and easy to use

Specification

Appearance	White thick liquid
pH	6.50-8.50
Specific gravity	1.0±0.1

Dosage

Aqua AG-500 can be used by diluting with water. Dilution and dosage will vary depends on the properties of effluent.

Handling and Storage

- ❖ Store in a cool place with ventilation.
- ❖ Avoid freezing or heating of the material.
- ❖ Seal the packing properly during interval while not in use
- ❖ Use gloves, goggles and other safety parameters while handling
- ❖ Recommended storage is 1 year from the date of manufacture
- ❖ Refer MSDS for more details

Packing

Aqua AG-500 is available in 30kg and 200kg HDPE drums.
